Traditions and Innovations

ABOUT US

Medical University - Pleven is a state regulated, self-governed, accredited specialized university and offers high quality education in the fields of Medicine and Health Care.

Our mission is to train professionals not only prepared to meet the challenges of medical science, but also following the motto of the University "Non sibi sed omnibus" - "Not for oneself but for all" by instilling the value of service and ideals of humanity in our students.

The University has the following basic units: Faculty of Medicine, Faculty of Pharmacy, Faculty of Public Health, Faculty of Health care, Department of Language and Specialized Training, Medical College, Research Institute and two University Hospitals.

The Faculty of Medicine offers a full-time six-year course of training in the specialty of Medicine. Medicine has been taught in English at Medical University-Pleven since 1997 and was the first English taught medicine program in Bulgaria. All graduates are awarded a Master's Degree diploma of completed higher medical education.

The education and scientific policy of Medical University-Pleven is in accordance with European and world standards. MU-Pleven is the first university in Eastern Europe to broadcast 3D live robotic operations for training purposes for medical students.

As a truly international and research intensive university, MU-Pleven recognizes the importance of constantly developing its education and facilities, to provide students with the knowledge and skills to make a positive contribution to ever changing health needs of an increasingly globalized society.

Many students choose Medical University - Pleven as the first step to their careers in medicine. The core values of the university consist of:

1. Providing high quality, research informed education with a commitment to serving the community.
2. Creating a stimulating environment for learning which supports the continuing professional development of all students.
3. Encouraging individual excellence and collaborative creativity.
4. Engendering a culture of team work and a belonging to the institutional and wider academic community.
5. Observing the highest ethical standards in education, research and public activity.

What we look for:

- Are you able to tackle problems head on and effectively deal with the academic and clinical challenges you are going to face in your education and career as a doctor?
- Are you able to maintain integrity and professionalism regardless of the situation you find yourself in?
- Are you the type of person who sees challenges as opportunities for self-development?
- Are you compassionate, putting your patients at the heart of everything you do?

If the answer is yes, then Medical University - Pleven is ready to help you fulfill your aspirations to be a world-class doctor.
